

## 2026 DWF Tournament Point System Rules

The purpose of the tournament point system is to recognize tournament participants and present awards for Angler of the Year and Captain of the Year, based on tournament weight history.

1. All tournament participants are eligible to participate in the points system, both members and non-members alike.
2. The point system will apply to walleye and perch tournaments only. The point system will not apply for the kids silver bass derby.
3. Each team member, including captains, will receive Angler Award credit for the total weight recorded by their boat/team for any tournament in which they participate. Total weight will correlate to total points. For example: If your team's boat had a total weight of 13.37 lbs for Tournament #1, each team member would be credited with 13.37 points towards their angle points.
4. In addition, each boat captain will also be credited points in the same manner towards the Captain of the Year award. You must be the captain of boat to receive this credit. It will therefore be statistically possible for a captain to win both Angler of the Year, and Captain of the Year.
5. Following the final tournament of year, total points will be accumulated, and prizes will be awarded to both Angler and Captain of the year, during one the regularly scheduled DWF general meetings.
